

## Biostatistics and Computer-based Analysis of Health Data using Stata (Hardback)

By Christophe Lalanne, Mounir Mesbah

ISTE Press Ltd - Elsevier Inc, United Kingdom, 2016. Hardback. Condition: New. Language: English. Brand new Book. This volume of the Biostatistics and Health Sciences Set focuses on statistics applied to clinical research. The use of Stata for data management and statistical modeling is illustrated using various examples. Many aspects of data processing and statistical analysis of cross-sectional and experimental medical data are covered, including regression models commonly found in medical statistics. This practical book is primarily intended for health researchers with basic knowledge of statistical methodology. Assuming basic concepts, the authors focus on the practice of biostatistical methods essential to clinical research, epidemiology and analysis of biomedical data (including comparison of two groups, analysis of categorical data, ANOVA, linear and logistic regression, and survival analysis). The use of examples from clinical trials and epidemiological studies provide the basis for a series of practical exercises, which provide instruction and familiarize the reader with essential Stata packages and commands.

### Reviews

*This book is great. It is written in simple words and not difficult to understand. I discovered this pdf from my dad and I suggested this ebook to find out.*  
-- Prof. Webster Barrows

*This ebook is fantastic. We have read and I also am confident that I am going to go to read through again yet again in the future. I am easily can get a pleasure of reading a published ebook.*  
-- Heloise Dare
